

# Calculus II, MA114/MA194 - 003/004

Fall 2022

## Recitation Handout

**Instructor:** Michael Morrow

**Email:** michael.morrow@uky.edu

**Office:** Patterson Office Tower 722

**Office Hours:** Tu: 2:00pm-3:00pm (Mathskeller), Tu/Th: 10:00am-11:00am (POT 722)

This handout is not a complete syllabus! The main course syllabus can be found on Canvas, and also <http://www.ms.uky.edu/~ma114/f.22/>.

**Recitation** meets on Tuesday and Thursday in the Whitehall Classroom Building:

- Section 003 meets 11:00am-12:15pm in CB201
- Section 004 meets 12:30pm-1:45pm in CB342

**Email Policy:** Email is the best way to contact me outside of class. Emails will usually be answered within 24 hours on weekdays and 48 hours on weekends.

**Grading for MA194:** To receive a passing grade in MA194, you must receive a D or better in MA114, and have no more than two unexcused absences.

**Participation Grade for MA114:** Recitation participation counts for 3.33% of your overall grade in MA114, whether or not you are enrolled in MA194. At the end of each class (unless there is a quiz), you will turn in written work **with your name on it** for a selected problem from that day's worksheet. This will be used to keep track of your attendance. You are allowed (and encouraged) to work with others, and multiple people may turn in the same sheet of work as long as their names are clearly indicated at the top (honor system: do not add your name if you did not contribute). Each day's turned-in work will be worth four points. You will need **80 points** for a perfect participation grade.

It is expected that you attend all recitations unless prevented from doing so by some university approved reason (illness, death of a family member, traveling with university organization, religious holidays, etc.) See <https://www.uky.edu/ombud/excused-absences> for more information. For your absence to be excused, it is expected that you provide proof of the reason for your absence (before the absence if possible, as soon as possible after if the absence is unexpected).

**Quizzes:** Quizzes will be given on the dates specified in the official course calendar. You will have approximately 15-20 minutes at the end of class to work on them. Once you are done with a quiz, you may turn it in at the front of the room and leave. Calculators will not be allowed for quizzes.

If you require disability accommodations for quizzes please arrange to discuss this with me so we can be sure you have what you need.

**Classroom Policies:** You may use electronic devices such as laptops or tablets to access the worksheets and homework during class. I reserve the right to mark any student absent that does not participate in recitation or arrives more than 15 minutes late.
